

Cabling

Structured Cable Plant Systems

Vision Technologies' full service structured cabling division specializes in providing you with commercial and industrial Information Transport Systems, with BICSI RCDD design personnel and BICSI certified installation staff. Our depth of experience with technology and project management allows us to provide the highest levels of service and quality at extremely competitive rates. Recognized by BICSI as a Prestige Contractor at the Platinum Level, Vision Technologies is one of only 25 so recognized around the world! We maintain a staff of RCDD's, BICSI-certified TPMA's, as well as BICSI-certified Technicians and Installers.

Our cabling division offers a comprehensive range of products and services, which they can deliver on a nationwide basis. From the design of the structured cable system to installation, testing and documentation, Vision's engineers can provide the services you need for a successful installation. Our capabilities enable us to provide voice/data/video cabling systems transmitting up to 10G to the desktop to data center infrastructure services which include detailed engineering to complete installation build. All of our Data Center projects are delivered in accordance with TIA-942 - "Telecommunications Infrastructure Standard for Data Centers"

Additionally, all personnel receive mandatory on-going education through classes and seminars, in order to keep pace with our rapidly changing environment. Certifications from major manufacturers enable Vision to provide cable plant installations warranted for up to 25 years! Not only are parts and labor covered, but the manufacturers warrant the ability of our installation to support your applications!

Our experience in supporting large installations is evidenced by our reference sites. Our attention to detail and best practices for installation allow us the ability to deliver world-class turnkey systems in virtually any type of installation environment. We have created a successful business model with the emphasis on being the company behind the company.

ON-SITE SUPPORT

Vision Technologies offers on-site support services for any level of service required. Service contracts can be arranged to meet any set of skills, service levels, response times, and technologies. Vision Technologies personnel can be dedicated to your operation or be just a page away.

Vision Technologies provides on-site support for:

- ▶ Cabling Technicians
- ▶ Moves/Adds/Changes
- ▶ Remedial Maintenance
- ▶ BICSI Certified RCDD's
- ▶ Network Support
- ▶ End-user Support

Vision Technologies is a full-service Technology Company committed to the highest quality craftsmanship and complete customer satisfaction. Our attention to detail and best practices for installation services allow us the ability to deliver world-class turnkey systems in virtually any type of installation environment. We have created a successful business model with the emphasis on being the company behind the company; we have been successful, partnering with our clients and partner companies throughout the world to improve business through technology. Vision Technologies meets your complex business requirements by providing industry compliant designs; implementation and support for network infrastructure, telephony, and communications cabling.

Our team of project managers, certified infrastructure engineers, RCDD's, networking consultants, and cabling experts work together to offer the full suite of networking solutions. A Vision Technologies Project Team focuses on every aspect of a technological build out including physical layer, Inside and Outside Plant, LAN, WAN, Circuits, Intranet, Internet, Automation, Multimedia Entertainment Systems, and applications.

Vision Technologies specializes in structured cable plant installation, support and engineering. Let Vision Technologies trained personnel help you make your infrastructure meet all the needs of your business. Certified by virtually every major manufacturer, Vision can provide certified systems with applications warranties up to 25 years. Engineering and installing industry standard Information Transport Systems provide you with rock-solid low-voltage infrastructure for voice, data, video, CCTV, access control and building automation systems.
