Information Transport Systems—Structured Cabling

Structured Cable Plant

Vision's full service structured cabling division specializes in providing you with commercial and industrial cabling, with BICSI RCDD design personnel and certified installation staff. Our depth of experience with technology and project management allows us to provide the highest levels of service and quality at extremely competitive rates.

Our cabling division offers a comprehensive range of products and services, which they can deliver on a nationwide basis. From the design of the structured cable system to installation, testing and documentation, Vision's engineers can provide the services you need for a successful installation. Additionally, all personnel receive mandatory ongoing education through classes and seminars, in order to keep pace with our rapidly changing environment.

Certifications from major manufacturers enable Vision to provide cable plant installations warranted for up to 25 years! Not only are parts and labor covered, but the manufacturers warrant the ability of our installation to support your applications!

Call Vision for a site survey and more information.

Structured Cable Plant

Turnkey Solution - Vision Technologies is a full-service Technology Company committed to the highest quality craftsmanship and complete customer satisfaction. Our attention to detail and best practices for installation services allow us the ability to deliver world-class turnkey systems in virtually any type of installation environment. We have created a successful business model with the emphasis on being the company behind the company; we have been successful, partnering with our clients and partner companies throughout the world to improve business through technology. Vision Technologies meets your complex business requirements by providing industry compliant designs; implementation and support for network infrastructure, telephony, and communications cabling.

Our team of project managers, certified infrastructure engineers, RCDD's, networking consultants, and cabling experts work together to offer the full suite of networking solutions. A Vision Technologies Project Team focuses on every aspect of a technological build out including physical layer, Inside and Outside Plant, LAN, WAN, Circuits, Intranet, Internet, Automation, Multimedia Entertainment Systems, and applications.

Professional Services – We are a professional services organization, an organization that implements comprehensive cabling systems. Our primary goal is to be more than just a cabling company. Our goal is to provide courteous, professional, and excellent service. We accomplish this goal by assuring a positive experience throughout the entire life cycle of our relationship with the customer and by exceeding the expectation at every opportunity. We stand behind our commitment to provide excellent service by offering a 100% Customer Satisfaction Guarantee on every service we provide.

Large-Scale Experience – Vision Technologies has a great deal of experience with large-scale and fast-track projects using diverse computer and voice technologies. Vision's employees have many years of experience supporting the enterprise with design services, implementation, and managing projects that are large in scale and complex in scope. Our experience in supporting large infrastructure projects is evidenced by our reference sites at clients like AT&T, AG Edwards, and Hoesch Celanese, plus world-class enterprises like Discovery Communications' new world headquarters; MBNA; The John's Hopkins University Applied Physics Lab; CareFirst; and General Dynamics. We currently provide post-installation MAC support (Moves, Adds and Changes) for each of the multiple-building, multiple-site clients. We have delivered on fast-track high-profile opportunities for Hewlett Packard and General Dynamics both locally and nationally. Reference sites represent our best opportunity to prove that we "Walk the Talk".
